

Drawing and Guessing

- Players should decide at the beginning of the game if points should be awarded for **Definition** guesses.
- Players should decide how many points are needed to win at the start of the game.
- Each player takes turns drawing a card from the top of the deck.
- The player whose turn it is must read the **Literal Meaning** on the top of the face side and draw what is described on the card within 1 minute and 30 seconds. No words can be written except logos.
- Guessers can continue to guess while the drawer is drawing.
- The drawer may assist by circling specific elements or adding small additions to the drawing.
- If the meaning is close enough for example “Large Lime Pepsi” instead of “Big Lemon Coke” the drawer can award the point.
This is a guideline, but ultimately the drawer can award points as they see fit.
- The first player to guess the drawing is awarded **1 Score Token** each.
- The Definition is located at the bottom of the card.
- (Optional) for bonus points allow guessers 1 guess at the **Definition**.
- Correct guesses award the player **2 Score Tokens**.
- The player who guessed the **Literal Meaning** correctly receives the card at the end of the turn. Keep the card faced up to prevent other players from seeing the zodiac.
- Otherwise, if no player is able to guess the card in 1 minute and 30 seconds, no points are allotted and the card is discarded.
